Int 21H, AH=0AH

Version

1 and higher

Brief

BUFFERED INPUT

Family API

DosRead

Input

```
AH = 0Ah
DS:DX -> buffer (see #01344)
```

Return

```
buffer filled with user input
```

Notes

^C/^Break are checked, and INT 23 is called if either detected reads from standard input, which may be redirected under DOS 2+

if the maximum buffer size is set to 00h, this call returns immediately without reading any input

Format of DOS input buffer:

Offset	Size	Description
00h	BYTE	maximum characters buffer can hold
01h	BYTE	(call) number of chars from last input which may be recalled (ret) number of characters actually read, excluding CR
02h	N BYTEs	actual characters read, including the final carriage return
