DosPortAccess

This call requests or releases access to ports for I/O privilege.

Syntax

```
DosPortAccess (Reserved, TypeOfAccess, FirstPort, LastPort)
```

Parameters

- Reserved (USHORT) - input : Must be set to zero.
- TypeOfAccess (USHORT) - input : A request for or release of access to a port.
 - 0 - Request access
 - 1 - Release access.
- FirstPort (USHORT) - input : Starting (low) number in a contiguous range or a single port.
- LastPort (USHORT) - input : Ending (high) number in a contiguous range or a single port. If only one port is being used, FirstPort and LastPort should both be set to this port.

Return Code

rc (USHORT) - return:Return code descriptions are:

- 0 NO_ERROR
- 5 ERROR_ACCESS_DENIED

Remarks

Note that CLI/STI privilege is also granted automatically. There is no need to make an additional call to [DosCLIAccess](#).

Applications that perform I/O to port(s) in IOPL segments must request port access from the operating system.

An application with no IOPL segments that accesses a device through a device driver or by an interface package such as VIO, does not need to issue this call. The device driver or interface package is responsible for obtaining the necessary I/O access.

Bindings

C

```
#define INCL_DOSDEVICES

USHORT rc = DosPortAccess(Reserved, TypeOfAccess, FirstPort, LastPort);

USHORT 0;           /* 0 */
USHORT TypeOfAccess; /* Request or release */
USHORT FirstPort;   /* First port number */
USHORT LastPort;    /* Last port number */

USHORT rc;          /* return code */
```

MASM

```
<cdoe asm> EXTRN DosPortAccess:FAR INCL_DOSDEVICES EQU 1
```

```
PUSH WORD 0 ;Reserved (must be zero) PUSH WORD TypeOfAccess ;Request or release PUSH WORD
FirstPort ;First port number PUSH WORD LastPort ;Last port number CALL DosPortAccess
```

Returns WORD </code>
