

[Q]: Скомпиленная TP 6.0 программка дает 100% загрузку мерлина

[A]: Alexander Samuylov (2:5030/39)

```
#include <dos.h> void interrupt ( *OldInt28)(void); void interrupt int28(void) {
```

```
    OldInt28();  
    enable();  
    _AX=0x1680;geninterrupt(0x2f);
```

```
} void main(void) {
```

```
    OldInt28 = getvect(0x28);  
    setvect(0x28, int28);  
    _dos_keep(0, (_SS + (_SP/16) - _psp));
```

```
}
```
