P.S. Все выше приведенное касается NW Requester 2.01 и OS/2 2.1, однако

действительно (проверено на личном опыте) для 2.11, WARP I, WARP II и 3.0. Не указаны лишь первоисточник и некоторые мелкие детали.

P.P.S. Для OS/2 3.0 проходит HE на ВСЕХ машинах. Диагноз устанавливается ;)
